

PRODUCTION

STORAGE/DISTRIBUTION

USE

SUSTAINABLE DEVELOPMENT

- Biomass gasification
- Biogas reforming

RAPSOSEE

- Compression and distribution: simulation

RAPSOSEE

- Fisher-Tropsch synthesis
- Methanation

RAPSOSEE

- PEMFC membrane materials: functionalization of clays
- Biological methanation

LGEI/ISR**LGEI/ISR**

- Purification (PSA, membrane, absorption)

GEPEA

- Porous materials
- Solid storage tank

GEPEA

- Power to gas platform: methanation, CO₂ capture

GEPEA

- Modeling & Optimization: Porous media, Adsorption, Storage, topology optimization

CERI EE

- Electrolysis PEM
- Plasma cracking, reforming
- Electrochemical purification LT
- Photocatalysis

PERSEE

- Electrochemical compression
- Porous materials

PERSEE

- PEMFC : MEA materials (catalysts and composite membranes), system studies (Transport, stationary, H₂ recirculation)
- CO₂ retroconversion (syngas)
- Renewable Energy coupling
- Multi-energy systems

PERSEE**PERSEE**

- Future energy systems and markets

- Phase diagrams / measurement of thermophysical properties
- Selection of solvents

CTP

- Life cycle analysis

OIE

- Electrolysis SOEC, PEMWE, MCEC
- System analysis

CES

- Electrolysis HT
- Reforming
- Electrochemical purification HT

MAT

- Composite tanks HP: Tests / Calculations
- Pipeline protection: Cold spray coating

MAT

- Methanation (Coelectrolysis)
- Power to gas
- CO₂ recycling
- Biogas

CES**CES**

- SOFC: MEA materials, new regenerative systems

MAT

- Process economics
- Territorial planning and public policies in energy transition

ISIGE**GÉOSCIENCES**

- Salt caverns: integrity/reactivity

GÉOSCIENCES

- Underground storage environmental impact

- Gas sensors: CO, H₂, safety/process control

SPIN

- Environmental analysis: qualitative assessment and absolute sustainability evaluation

FAYOL

- Pipeline embrittlement

SMS

- SOFC single chamber

SPIN

- Biomass flash pyrolysis

UCP

- Doped MOFs (C, metal, metal+C)
- Liquid carriers (LOHC)
- Hydrides

UCP

- Combustion
- Reactivity/Risk

UCP

- Tech-eco evaluation of the distribution chain

UCP

- Solar photoreactive processes

I. PASCAL
